

Crossword Puzzle (Fill in the blank of each number)

Word Bank

Oxygen ; Carbon Dioxide ; Sugar ; Green ; Water ; Sunlight ;
Chloroplast ; Chlorophyll ; Photosynthesis

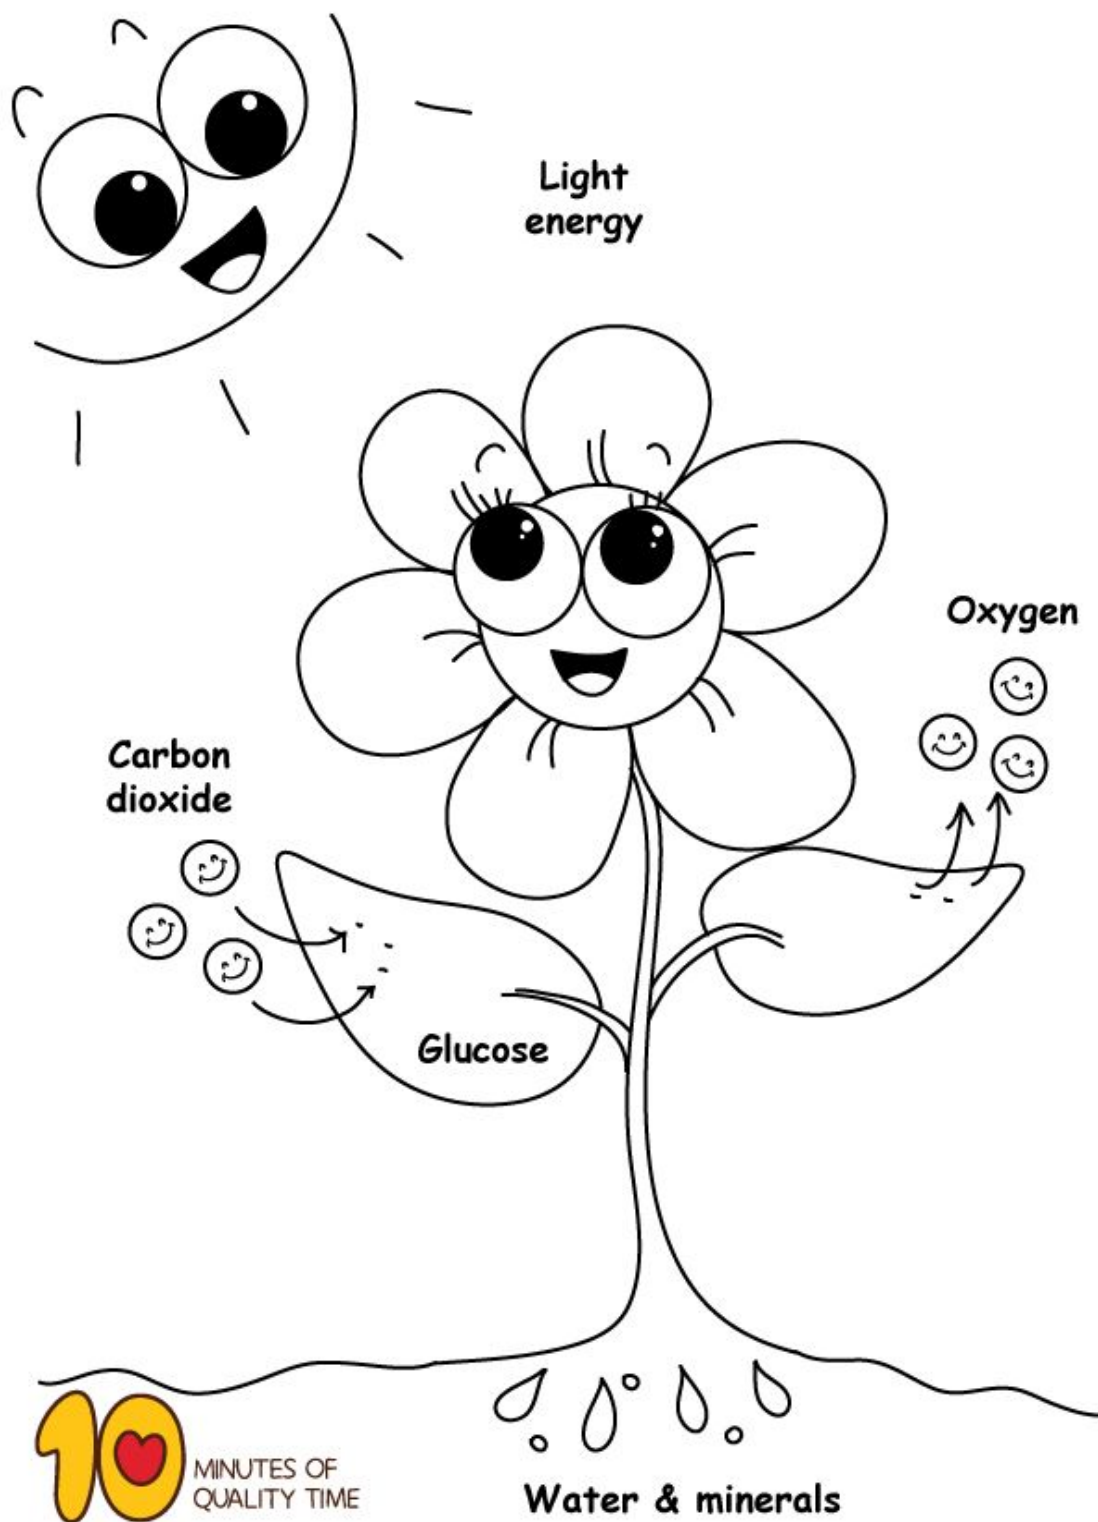

Across:

- 1.) Part of the chloroplast that helps turn light into energy and also makes plants green
- 5.) Product of photosynthesis that plants don't use, but we breathe
- 7.) What plants use as energy to photosynthesize
- 8.) The product of photosynthesis that plants use as food

Down:

- 1.) Part of the plant cell that contains chlorophyll
- 2.) The process plants undergo to make their own food from sunlight
- 3.) One of the products plants use when photosynthesizing (2 words)
- 4.) Chlorophyll causes plants to be this color
- 5.) Another product used during photosynthesis, we also need it when we are thirsty

Coloring (Remember which color the chlorophyll makes leaves... or just have fun!)

Important Note! Glucose is another name for Sugar!
